

**HANOVER COUNTY EMERGENCY
COMMUNICATIONS 911 CENTER**

NEW PRIORITY DISPATCH SYSTEM

911 Dispatchers- The Nation's FIRST- first responders!

Hanover's 911 Center recently began using the largest medical priority system in the world. The National Academy of Emergency Medical Dispatch trained all of the dispatchers and they are well on their way to being an accredited center of excellence. This system allows the emergency call takers to triage, or sort, the priority calls by asking a series of medical questions. It also assists in life saving techniques such as CPR and using an AED when necessary with the caller. This program is recommended by physicians and is monitored by physicians in order to provide the best patient care possible. If you have any questions or would like additional information send it to the address below.
